

Şirketimiz

Dünyada değişen iklim koşulları ve küresel ısınma nedeniyle yeryüzündeki suya olan ihtiyaç her geçen gün artmakta ve suyun değeri daha çok anlam kazanmaktadır. Ülkeler artık suyu korumak için üreticilerini ve çiftçilerini basınçsız sulama sistemlerine yönlendirerek önlemler almaya çalışmaktadırlar. İşte bu fikir ile sadece ülkemizde değil bütün dünyada su tasarrufunu sağlamak adına firmamız tarımsal sulama sistemlerinin üretimini yapmakta ve dünyada 50 den fazla ülkeye ihraç etmektedir.

Our company

Due to the changing climatic conditions in the world and global warming, the necessity of water in the earth is increasing day by day and the value of water is make sense more. Countries are now trying to take measures to protect water by directing their producers and farmers to non-pressurized irrigation systems. With this idea, our company produces agricultural irrigation systems and exports them to more than 50 countries all over the world in order to save water not only in our country but also all over the world.

NEDEN İRRITIME?

Alanında uzman personeli ile kaliteyi ön planda tutarak, değişim ve gelişimin bir işletme için gerekliliğine inanan İRRITIME ailesi içinde bulunduğu Pazar dinamiklerine, teknolojik ihtiyaçlara ve pazardaki değişimlere ayak uydurmak için gerekli adımları atmaktan geri durmaz.

Müşterilerimize ve işimize duyduğumuz saygının gereği olarak ürün ve hizmetlerimizin kalitesini müşterilerimizin beklentilerinin üstünde sunmaya gayret ederiz. Tüm faaliyetlerimizde çevre ve insan sağlığını korumayı gözetiriz. Tüm çalışanlarımıza ve paydaşlarımıza değer verir, adil yaklaşırız. Karşılıklı kazan kazan ilişkisini prensiplerimizin temeline koyar, verdiğimiz sözü tutmaya özen gösterir, siparişlerimizi eksiksiz ve zamanında teslim etmeye çalışırız.

WHY İRRITIME?

The İRRITIME family, which believes in the necessity of change and development for a business, by prioritizing quality with its expert staff, does not hesitate to take the necessary steps to keep up with the market dynamics, technological needs and changes in the market.

As a requirement of the respect we have for our customers and our business, we strive to offer the quality of our products and services above the expectations of our customers. We take care to protect the environment and human health in all our activities. We value all our employees and stakeholders and approach them fairly. We put the mutual win-win relationship on the basis of our principles, take care to keep our promises, and try to deliver our orders completely and on time.

*We are
more than 50 countries
all over the world...*

PRESSURE-COMPENSATING, SELF-CLEANING, ANTI-SIPHON MECHANISM DRIPPER

The most durable Pressure Compensating dirpline, designed for steep and rocky terrain, permanent crops with long laterals, on surface and subsurface applications

Anti-Siphon (AS)

The Anti-Siphon (AS) system is a specially designed mechanism that prevents suction of dirt and impurities into the emitter. The AS feature enables STAR-S to be installed underground (SDI), perfectly maintaining its irrigation characteristics and its multi-year durability.

YAĞMURLAMA SİSTEMLERİ SPRINKLER SYSTEMS

YAĞMURLAMA SİSTEMİ KURULUM PLANI

QUICK COUPLING SPRINKLER SYSTEM INSTALLATION DESIGN

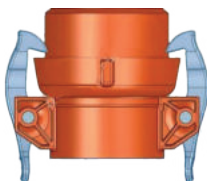

Özellikleri ve Faydaları

- 1) Yağmurlama Sistemi boruları plastik malzemeden imal edildiğinden dolayı arazide kolay taşıma için çok elverişlidir.
- 2) Yağmurlama Sulama sistemi mobil sistemdir. Bu nedenle, arazinin her yerine kurulum yapmanız gerekmez. Sabit Sulama Sisteminde böyle bir seçeneğiniz yoktur, çünkü her yere kurmanız gerekir.
- 3) Bu Sprinkler sistemini minimumdan maksimum boyuta kadar herhangi bir alanda kullanabilirsiniz. (Center Pivot Sistemi küçük araziler için pahalı sistemlerdir) Hızlı Bağlantı Sistemimiz, küçük arazileri olan küçük çiftçiler için avantaj sağlar.
- 4) Belirli bir alanı sularken, zaman kaybetmemek için diğer ikinci alanın borularını taşıyabilirsiniz.
- 5) Toprak işleme makinelerini ve traktörleri vb. araziye sokmak isterseniz, borunun bir kısmını sistemden çıkartıp makina ve traktörlerin çalışması için uygun alan oluşturabilirsiniz.
- 6) Sulama yapmak istediğiniz boruları şekilsiz arazilerin bir kısmında taşıyabilirsiniz.
- 7) Borular için ayrıca bir ek parça (Kablin Manşon) gereksiniminiz olmaz. Çünkü borular ek parçaları ile kaynatılmış olarak size gelir. Sabit sistemler de bu ek parçalara ihtiyacınız vardır.
- 8) Sulamayı sizin kontrolünüzdedir !! Yeteri kadar su ile sulama yapmak istediğiniz yeri sulayabilirsiniz. Suyu tasarrufu sağlarsınız.
- 9) Diğer yağmurlama sulama sistemlerinde suladığınız tüm mahsulleri bu sulama sistemi ile de sulayabilirsiniz.

Features and Benefits

- 1) Sprinkler system pipes are made of plastic material, making it very convenient for easy transport in the field.
- 2) Sprinkler Irrigation system is mobile system. Because of this you don't need to install everywhere of the land. In the Fixed Irrigation System you do not have such an option because you need to install it everywhere.
- 3) You can use this Sprinkler system in any area from minimum to maximum size. (Centre Pivot System is expensive systems for small lands) Our Quick Coupling Systems has advantage for small farmers who have small lands.
- 4) When irrigating a particular area, you can transport the pipes of the other second area so that you do not Flow time.
- 5) Soil cultivation machines and tractors and so on. If you want to get into the field, you can remove some of the pipe from the system and create a suitable area for the operation of machinery and tractors.
- 6) You can carry the pipes where you want to irrigate on part of formless lands
- 7) You don't need to use more fittings (couplings, saddles etc.) for pipes because pipes welded with their fittings completely. Fixed Irrigation Systems you need all these fittings with the pipes.
- 8) You can control the irrigation!! You can irrigate where you want to irrigate on lands with enough water. You save the water.
- 9) You can also irrigate all crops that you irrigate with other sprinkler irrigation systems.
